

Combo Access Device

Product Code
59009

GARAGE DOOR OPENERS

Features:

- Recommended when the garage door is the only means of access to the garage.
- Allows you to open the door manually during a power failure (RDO only), using a key to remove the barrel with a cord attached to the disengagement handle.
- Also allows for electrical key operation of RDO and SDO.

How it works:

The Combo Access Device can be used as an electric Key Switch for all types of automatic garage door openers and it can also be used as an Emergency Access Device for rolling garage door openers. (You may need an External Access Pulley Kit, Part No. 50502 for MPC2 and MPC3). The fitting rods supplied are suitable for walls up to 250mm thick.
